Crash Course on Python

Cambridge English Level 2 Certificate in ESOL International (Advanced)

Radu-Ioan Gherman

Graduate of the Faculty of Economic Cybernetics within the Academy of Economic Studies in Romania
Bucharest, Bucharest, Romania

Summary

Graduate of the Faculty of Cybernetics, Statistics and Economic Informatics with
a solid foundation in automation and articial intelligence. Experienced in
developing and implementing AI models and automation solutions for various
applications. I am looking for a challenging role in a welcoming company where I
can apply my skills and contribute to innovative projects.

My most significant work includes creating a virtual assistant using Hugging Face, part of my college licensing exam project. The virtual assistant is integrated into a basic banking system, enabling users to manage accounts, authenticate, and interact with two AI models:

Conversational AI Model: Supports interactions in Romanian and English via voice or text, guiding users through account-related issues.
Summarization AI Model: Summarizes banking documents, providing concise and relevant information.

The project involved extensive work with tokenization, data preprocessing, training, and performance evaluation of AI models using custom datasets. The training processes were meticulously configured and executed to ensure accurate and reliable model outputs : https://github.com/mTwR0/EVA

My second most important interest is in automation, particularly using UiPath and Python to create efficient and scalable automation solutions.

Additionally, I have experience with Unity for game development and have worked on various projects using C++.

Experience

CGS (Computer Generated Solutions)
Technical support
September 2024 - November 2025 (1 year 3 months)
bucharest

Provided technical support via Twilio calls for businesses in the United Kingdom, resolving 70% of customer issues on first contact by accurately diagnosing and resolving problems using tools like Nayax Core and ServiceNow.
Analyzed and reconfigured POS devices to resolve issues, ensuring reliable operation of client-owned systems

Autonom Group
Junior Programmer
June 2023 - August 2023 (3 months)
Piatra Neamţ, Neamţ, Romania

Education

Bucharest University of Economic Studies
Bachelor's degree, Cybernetics, statistics and Informatics · (October 2020 - June 2024)
